

DIES FROM PNEUMONIA

Little Eunice May Baldwin was born September 15th, 1918, and departed this life March 6th, 1920, aged 1 year, 5 months and 21 days. The little one had contracted whooping cough some time ago, which finally turned into pneumonia, resulting in death.

Thus over a happy home the shadow of the little grave has fallen; and, as another has said, it is wonderful how long a shadow a little grave can throw.

Funeral services were held from the home Monday afternoon, conducted by Rev. W. A. Ferrell.
